

With decades of experience and a strong track record of supporting our customers' missions, REI Systems truly stands above the thousands of Government contractors in the Washington, D.C. metro area. We believe that – when done right – IT can impact millions of lives, and we pride ourselves in being directly involved in our customers' end-game by delivering results that truly matter. For REI Systems, it all comes down to what we value most: **Results. Period.**

## WHAT WE DO

We go above and beyond client expectations **in everything we do.**

### Grants Management

Grant programs are complex – one size does not fit all. REI's grants management solutions understand your agency's mission, methods, and expectations so you get the best results with solutions that align to your mission, grantee needs, and legislation.

### Decision and Data Analytics

REI's analytics models help agencies better understand their data, translate data into insight, and support decision-making. We engage our customers and leverage IT for a tailored solution.

### SaaS and Cloud

We create ready-made cloud solutions for Government and business. REI has performed 450+ implementations as a Salesforce® Silver Consulting Partner. Our solutions make IT easier by cutting infrastructure, operations, and security costs.

### Accountability in Government

Having an accountable Government strengthens democracy and promotes efficiency and effectiveness. REI helps agencies raise citizens' trust by helping Government provide information that citizens value.

### Mission-Enabling Solutions

Unique agency missions call for unique solutions. REI uses modern no- or low-code platforms to tailor solutions to agencies with unique mandates and customer expectations. Our microservices model also makes it easy to adapt in a changing environment.

### Advisory Services

REI knows that IT doesn't work in a vacuum. We help agencies get the most from their technology by advising clients on change management, process improvement, strategic communications, shared services, and IT investment.

## WHY WE DO IT

We empower our clients to make a difference...**impacting millions.**

Through an REI-developed program, the DOJ's Bullet Proof Vest Partnership has provided more than **1.2 million** vests to **U.S. Law Enforcement Officers.**

Enabled by REI's grants management technology, the HHS's national health centers programs support **9,000 health centers**, improving the health of **40 million patients.**

Supported by REI, the NASA Small Business Innovation Research Program leads to more than **3,000 new jobs** each year and **technological breakthroughs.**
