Grantee focus group results, feedback and burden reduction

1. Grant recipients appreciate partnering with grantors!

2. Grantees aren't afraid of performance accountability. In fact, we like it!

3. There seems to be little or no coordination between grantors.

4. What's good for the goose... timely response deadlines are set for grantees, and should be set for grantors, too.

5. IT Systems – Let's make the benefits outweigh the challenges.

6. Technical assistance – there are better ways to do it.

7. A strong dose of “user-centered design” could guide an effort to streamline compliance requirements.

8. Grant recipients need a collaboration forum.
