

With decades of experience and a strong track record of supporting our customers’ missions, REI Systems truly stands above the thousands of Government contractors in the Washington D.C. metro area. We believe that—when done right—IT can impact millions of lives, and we pride ourselves in being directly involved in our customers’ end-game by delivering results that truly matter. For REI Systems, it all comes down to what we value most: **Results. Period.**

WHAT WE DO

We go above and beyond client expectations in **everything we do.**

Application Modernization

REI’s Mindful Modernization solution integrates business, management, and technology to deliver highly adopted capabilities using outcome-focused, agile teams served by hands-on leaders with full transparency. We Align, Architect, Assemble, Adopt, and Advance our client’s mission solutions to deliver the highest value on time and on plan.

Advisory Services

REI knows that IT doesn’t work in a vacuum. We help agencies get the most from their technology by advising clients on change management, Technology Business Management (TBM), process improvement, strategic communications, shared services, and IT investment.

Grants Management

Grant programs are complex—one size does not fit all. REI’s grants management solutions understand your agency’s mission, methods, and expectations so you get the best results with solutions that align to your mission, grantee needs, and legislation.

Innovation Research Management

REI has more than 20 years of experience supporting Federal agencies in all areas of the software application development, CIO Support, and IT Services domains. Our long record of strong past performance supporting the Small Business Innovation Research (SBIR) / Small Business Technology Transfer (STTR) programs and Earth Science Technology Office (ESTO) and our experienced staff representing about 100 years of cumulative NASA SBIR/ STTR and ESTO experience, will enable REI to continue our partnership with NASA to accomplish the objectives of the tasks contemplated for this Phase III award.

Analytics

REI’s analytics models help agencies better understand their data, translate data into insight, and support decision-making. We engage our customers and leverage IT for a tailored solution.

WHY WE DO IT

We empower our clients to make a difference **impacting millions.**

Through an REI-developed program, the DOJ’s Bullet Proof Vest Partnership has provided more than **1.2 million** vests to U.S. Law Enforcement Officers.

Enabled by REI’s grants management technology, the HHS supports **9,000** health centers, improving the lives of **40 million** patients.

Supported by REI, the NASA Small Business Innovation Research Program leads to technological breakthroughs and more than **3,000** new jobs each year.
