

# <Low / Code>

= Low Cost + High Quality + Rapid Delivery

## Why Choose REI's Low Code Solutions

Organizations throughout the federal government are turning to low code solutions to deal with increasing O&M costs of legacy systems.

An ever-increasing demand for services have many agencies struggling to meet the demands of their stakeholders.

REI Systems' low code platforms, combined with our Mindful Modernization® approach and Agile best practices, have allowed us to develop and deploy numerous mission-critical solutions for our clients. These solutions help our clients meet the competing demands of speed, scalability, security, and ease of use, at minimal cost, and without the substantial maintenance burden seen with custom solutions.

On average, a low code approach offers high quality results 4-6 times faster than a custom coded effort. What would have taken a year to develop, now only takes 12 weeks. This tremendous gain in efficiency allows agencies to allocate their technology spending more efficiently and focus on areas that will derive the greatest impact on their mission.

### FEATURES

- Incorporate leading-edge security
- Reuse functionality across applications
- Utilize tailored case management
- Fast software development

### BENEFITS

- Increased automation
- Enhanced collaboration
- Increased speed of development
- Improved code quality
- Reduced risk management
- Lower total cost of ownership
- Improved customer experience
- Mobile friendly

## LOW CODE PAST PERFORMANCE

AGENCY/ ORGANIZATION	LOW CODE PLATFORM	SOLUTIONS DELIVERED	IMPACT & RESULTS
 <p>Comptroller of the Currency Administrator of National Banks US Department of the Treasury</p>		<ul style="list-style-type: none"> <li>Central Application Tracking System (CATS)</li> <li>Supervisory Product Review Tool (SPRT)</li> <li>Site Assessment and Accountability System (SAAS)</li> <li>National Risk Reporting Tool (NRISK)</li> </ul>	<ul style="list-style-type: none"> <li>Streamlined five legacy applications into a single system</li> <li>Achieved 100% on-time product delivery</li> <li>Increased reporting compliance</li> <li>Increased use of electronic filing - converting manual processes to automated web applications</li> </ul>
