

REI Accelerated Delivery Excellence:

Mission-Driven, Customer-Centric, AI-Enabled

REI Systems accelerates mission impact by **combining speed, precision, and innovation** to help agencies deliver high-value results faster. In today's complex environment, success depends not just on rapid execution, but on delivering the right outcomes with agility, security, and confidence. Our AI-enabled, customer-aligned approach enhances delivery velocity and embeds adaptive risk management throughout the lifecycle—so teams can anticipate challenges earlier, reduce uncertainty, and stay focused on measurable impact.

The REI Difference: Accelerating Outcomes Through Innovation

We drive meaningful efficiencies through intelligent automation and AI-driven delivery frameworks, enhancing productivity, compressing timelines, and reducing costs. By continuously upskilling our teams to effectively harness these tools, we deliver secure, reliable solutions with greater speed and less rework, translating innovation into measurable mission results.

Accelerated Impact in Action

SOFTWARE DEVELOPMENT

60% of REI pilot respondents reported **10–30% productivity** gains using Windsurf (formerly Codeium)—cutting coding time and improving accuracy.

TECHNOLOGY BUSINESS MANAGEMENT (TBM)

With a **97% accuracy rate**, our NLP model correctly classified \$15B of IT spend data in minutes, instead of weeks of manual, low-value, error-prone labeling efforts, **saving more than \$209,000** in labor costs.

PROJECT MANAGEMENT

REI project managers **cut administrative effort by 40%** and uncovered 15+ hidden risks by integrating AI copilots for automated reporting, risk analysis, and smarter project oversight.

MODERNIZATION

Using tools such as Rhino.ai and Axal across different legacy applications' modernization, REI accelerated delivery by about **30–40% saving \$450K** and 6+ months of time by **transforming 400K+ lines of code** into cloud-native applications.
