

Purpose-Built for Discretionary Grant Peer Review

Selecting the strongest proposals is critical to advancing agency missions.

Federal grant programs rely on rigorous, independent peer review to ensure funding decisions are fair, transparent, and defensible. Managing this process across high volumes of submissions, reviewers, and panels can create significant administrative burden and risk.

GovReview™ is a modern, enterprise-grade platform purpose-built for discretionary grant peer review. It enables agencies to conduct efficient, transparent, and scalable evaluations while maintaining the rigor required for mission-critical funding decisions.

Feature	Benefit
End-to-End Peer Review Lifecycle	Supports the full process from intake through final funding recommendations across independent and panel-based reviews.
Program-Level Configuration	Enables staff to define criteria, scoring, and panel setup without technical support, accelerating setup and adapting to program needs.
Integrated Review & Panel Collaboration	Captures evaluations, aggregates scoring, and supports real-time collaboration, reducing post-panel effort while maintaining rigor.
Transparent, Defensible Outcomes	Provides traceability across scoring, decisions, and documentation, supporting audit-ready results.
Scalable, High-Volume Performance	Supports thousands of reviewers and panels annually without increasing administrative burden.
Data & Decision Insights	Delivers reporting and analytics that support consistent, data-informed funding decisions.

GovReview™ supports the full lifecycle of peer review, from proposal intake through final funding recommendations, helping agencies:

- **Select the strongest proposals**
- **Reduce administrative burden**
- **Ensure transparency & audit readiness**
- **Improve reviewer & panel experience**
- **Scale review operations with confidence**

Replace spreadsheets and email chains with one unified system, delivering real-time visibility, efficiency, and trust.

Mission Impact

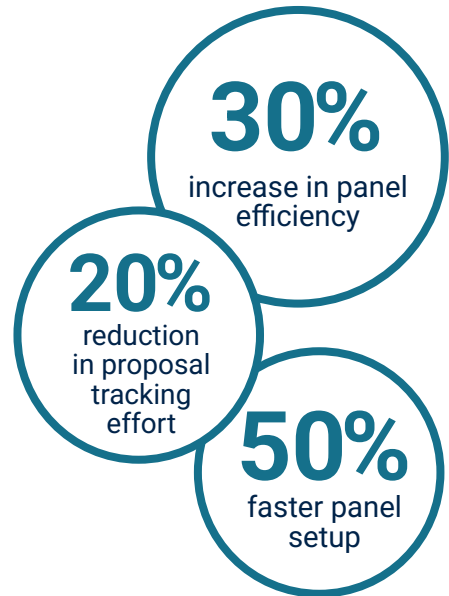

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA)

REI has supported peer review for NASA's Earth Science Technology Office (ESTO) and Small Spacecraft Technology (SST) programs for over a decade. GovReview™ provides secure access for reviewers to evaluate proposals, while enabling Panel Leads and Program Managers to efficiently review, rank, and manage outcomes. Built to support high volumes of concurrent evaluations, the platform streamlines operations at scale. Self-service panel setup allows program staff to create panels and assign proposals with ease, reducing setup time by 50%.

NATIONAL SCIENCE FOUNDATION (NSF)

GovReview™ replaced a legacy peer review system that struggled with scalability, usability, and integration. Today, the platform supports approximately 1,500 panels and 12,000 reviewers annually, while enabling program staff to configure reviews to meet their needs. The result is a more efficient, transparent process—including a 30% increase in panel efficiency and measurable reductions in administrative effort (about 20% for proposal tracking and 50% faster panel setup), helping NSF deliver faster, more consistent, and defensible funding decisions.
