

REINA™ AI: Governed AI for Faster, Defensible Decisions in Salesforce

Governed by Design. Built to Scale. Ready to Deploy.

REINA™ AI (REI Navigational Assistant) is REI Systems' governed-by-design agentic AI system built on Salesforce Agentforce. It enables teams to analyze, summarize, and answer questions about complex documents, such as grant applications and case files, directly in Salesforce, while preserving human oversight, traceability, and enterprise governance.

Designed as a scalable system rather than a single AI assistant, REINA™ AI delivers immediate value at launch and enables rapid expansion of additional AI behaviors and analyses over time without re-architecting or increasing risk.

Why REINA™ AI

Organizations are under pressure to move faster with AI, but document-heavy decisions demand accuracy, defensibility, and control. Many AI tools prioritize speed while leaving governance, transparency, and trust as afterthoughts.

REINA™ AI was built to close that gap.

REINA™ AI Benefits

Faster, Defensible Decisions

Governed by Design

Rapid Time to Value

Built as a System,
Not an Assistant

Salesforce-Native &
Agentforce-Ready

Available on Salesforce
AgentExchange Marketplace

Built for High-Accountability, Document-Heavy Workflows

At launch, REINA™ AI enables organizations to analyze and work with PDFs, scanned forms, and image-based documents linked to Salesforce records, including:

- Document understanding and full-content extraction
- Document-aware summarization and question-and-answer
- Instruction-driven analysis and validation

Governed-by-Design Architecture

REINA™ AI embeds governance into the core of the system—not as an add-on—so teams can move faster while maintaining clear ownership, accountability, and confidence in their decisions.

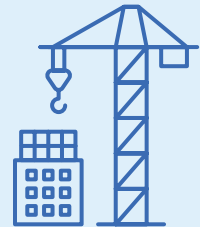

KEY GOVERNANCE CAPABILITIES

- Permission-Aware by Default
- Answer Provenance and Traceability
- Human-in-the-Loop Controls
- Policy and Instruction Versioning
- Audit-Ready Activity

DESIGNED FOR RAPID EXPANSION

REINA™ AI is intentionally architected to grow responsibly:

- Add new AI behaviors and analyses without re-architecting
- Introduce additional agentic capabilities incrementally
- Maintain governance, consistency, and control as scope expands

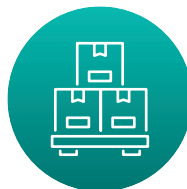

VALUES FOR SALESFORCE PARTNERS AND SYSTEM INTEGRATORS

For Salesforce partners and system integrators, REINA™ AI provides a pre-built, governed foundation that accelerates delivery and monetization:

Deploy agentic solutions
faster on Agentforce

Extend and **package**
capabilities without rebuilding
governance controls

Reduce delivery risk
while **accelerating**
time to market

Available on Salesforce AgentExchange Marketplace

REINA™ AI is available as an independent solution on the Salesforce AgentExchange marketplace and can be installed on Salesforce instances without dependency on a single REI product.
